Assoc CIPD | MHRAP

People Analytics & HR Data Specialist — SQL (PostgreSQL) | Power BI | Workforce Planning | HRIS

Leeds, United Kingdom | +44 740 278 9527 | medunoyeolajumoke@gmail.com | linkedin.com/in/olajumoke-medunoye | github.com/olajumokemedunoye | olajumokemedunoye.github.io

PROFESSIONAL SUMMARY

People analytics and HRIS professional with an MSc in Human Resource Management, MHRAP certification, and over 10 years of professional experience, including hands-on delivery of SQL (PostgreSQL) and Power BI-driven workforce reporting. Skilled in data validation, data governance, and cross-functional stakeholder coordination across HR, Operations, and business leadership. Cut HR reporting turnaround time by 60% through automation, and has built attrition prediction, headcount forecasting, and recruitment analytics models spanning the full data pipeline from SQL extraction to executive-ready visualisation.

CORE SKILLS

- Data & Analytics:** SQL (PostgreSQL), Power BI, DAX, Python, Advanced Excel, Power Query, Data Modelling, Data Validation
- People Analytics:** Workforce Planning, Headcount Forecasting, Attrition & Retention Analysis, Recruitment Analytics, Predictive Modelling
- HRIS & Systems:** Workday, SAP SuccessFactors, BambooHR, HR Data Governance, Employee Lifecycle Management
- Collaboration:** Cross-functional reporting and data coordination with HR, Operations, and business stakeholders

KEY ACHIEVEMENTS

- Cut HR reporting turnaround time by 60% by automating recurring reports in Power BI.
- Built an ML-based attrition prediction model in Python, combined with SQL and Power BI, for proactive retention planning.
- Delivered executive workforce dashboards that improved reporting accuracy and sped up leadership decision-making.
- Led and coached a 36-person Customer Success team, using KPI dashboards to lift operational visibility.

PROFESSIONAL EXPERIENCE

HR Analyst Consultant (Remote) <i>10Alytics.io</i>	2024 – Present
- Designed interactive Power BI dashboards that automated HR reporting, cutting turnaround time by 60%. - Ran workforce analytics, retention analysis, and attrition-driver reporting for HR stakeholders. - Cleaned, validated, and modelled HRIS data in SQL (PostgreSQL), Excel, and Power BI to improve reporting accuracy and data integrity. - Produced executive-ready dashboards enabling evidence-based workforce decisions; supported headcount reporting and KPI tracking for workforce planning, coordinating data requirements with cross-functional stakeholders.	
Customer Success Team Lead <i>Tangerine Africa</i>	Jan 2019 – Mar 2023
- Led, coached, and developed a team of 36 Customer Success professionals. - Designed KPI dashboards giving leadership real-time operational insight; analysed performance data to identify improvement opportunities and standardise reporting.	
Customer Service Advisor <i>Conduent, Leeds</i>	Jul 2023 – Present
Managed high-volume customer interactions against SLA and quality targets while tracking CSAT, AHT, and FCR metrics and identifying operational trends through data analysis.	

SELECTED ANALYTICS PROJECTS

- Workforce Capacity Planning & Headcount Forecasting:** Built forecasting models and executive Power BI dashboards to visualise workforce demand and capacity for growth planning.
- AI Predictive Attrition Model:** Python ML model predicting employee attrition risk, combined with SQL and Power BI for proactive retention planning.
- HR Attrition & Cost-of-Turnover Analysis:** Analysed attrition trends by department, tenure, and performance; produced recommendations to cut turnover cost.
- Recruitment Pipeline Analytics:** Built dashboards tracking sourcing effectiveness, conversion rates, and time-to-hire to identify process bottlenecks.
